A-11-1

Nowadays people around the world and especially students are concerned about ~~the~~ AI and its constant expansion, which led to using assistant in education. The purpose of the survey is to find out what students think about this case and suggest the way of solving the possible problems.

First of all, it's a surprise that more than a half of the students (60%) are ~~supportive~~ okay with using AI in education ~~and they're supportive of this idea~~. However, the forth of the polled students (25%) are concerned about the opportunity of using AI in education. The least popular option is for students who are not sure about ~~their response~~ ^{it} (15%).

The results of the survey represent that a lot of students are not against AI in education. I guess it's because AI can be ~~pretty~~ helpful when it comes to homework or some ~~direct~~ activities like ~~writing a song~~ or giving a piece of advice. ~~I can also understand~~ It is also clear that 25% of the polled students are skeptical about AI in education because ~~the~~ it might reduce critical thinking and creativity of the students, as much as cheating and the possibility of AI making mistakes.

In my opinion, AI can be a very helpful assistant if you are not overusing it. ~~Nowadays a lot of students around the world use AI for different~~ I think that access to AI should be reduced and adapted ^{to} for student's needs, so that students not ~~just~~ ^{get} answers, but ~~still~~ hints that can motivate ones to think on their own.

In conclusion, ~~a~~ a huge amount of students uses AI assistant as a key ~~to~~ to all the tasks. Only a small amount of people ~~claim that~~ reckon that using AI is not a good idea. There are problems that can arise with either using, or ~~at~~ not using AI assistant.
